

## Notes on user face registration

### Import requirements:

1. The naming format for uploading imported pictures is: name\_number\_gender.jpg;

Note: The input type of name and number is limited to text, letters, numbers, spaces, and the number is unique;

2. The upload image format must be jpg format;

3. The upper limit of the pixel size of the uploaded image is 960\*960, and the lower limit is 500\*500;

4. The memory size of the uploaded image file must be less than 2M;

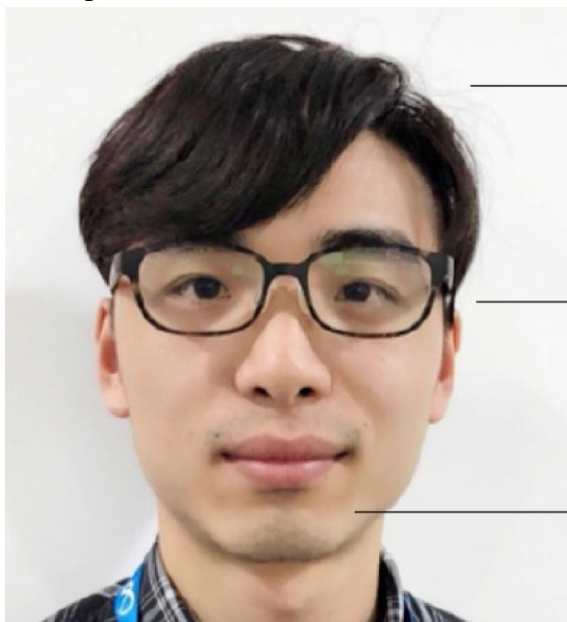

5. The uploaded pictures must be authentic, and do not modify or beautify the pictures;

6. Choose white as the best background for the photo, to ensure that the face has enough light, the light is evenly received, and the face image is clear.

### Examples of registered photos:

#### 1.Examples of standardized photos:

Examples of male photos:

● Monochrome background (white is best)

● Positive full face

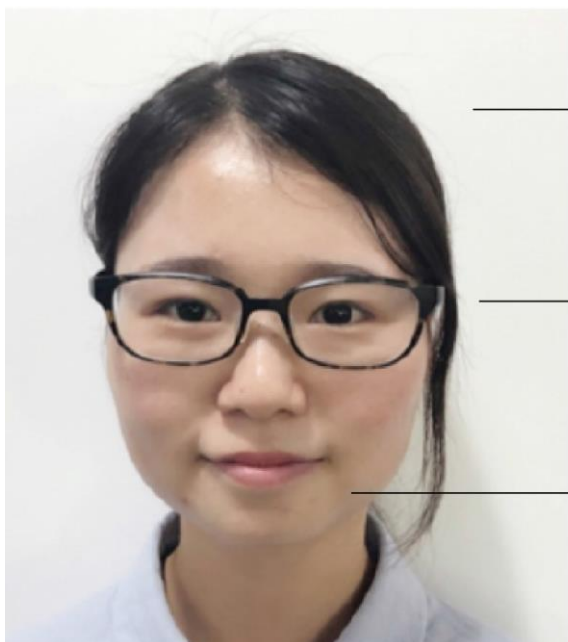

● Natural expression

● Eyeglass lenses without reflection
